ELECTION/ RESTRICTION REQUIREMENT

Sir:

In response to the Examiner's Election/Restriction Requirement dated December 1, 2008, for which a response is due by January 1, 2009, please consider the following remarks.

Applicants hereby elect without traverse the invention defined in Group I, claims 1-36, drawn to compounds or compositions of the Formula I, classified in class 544 and various subclasses depending on the nature of the substituents.

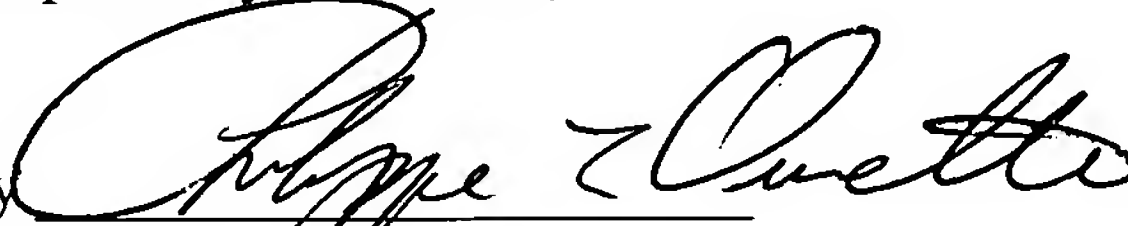

The Examiner has required restriction between product and process claims. Applicants note that, upon an indication of allowable subject matter in Group I, the process claims of Group II should be rejoined under MPEP §821.04 so long as they are commensurate in scope therewith.

Applicants have also been asked to elect a single disclosed species.

Applicants elect without traverse for the purposes of restriction and examination the species as set forth in Example 3 denoted on page 16, lines 2-11, of the present application, namely, the compound of formula (I) wherein HX is benzenesulfonic acid.

While Applicants do not concede that the above-identified species would not also encompass other claims, the following claims appear to form a group commensurate with the elected species for search and examination purposes only: Claims 1, 3, 21-25, and 36. Claims other than those listed here may also be relevant to the elected species in certain cases.

Respectfully submitted,

By 

Philippe L. Durette
